

## CONTAINER WICK GUIDE

The Guide below is for the soy waxes that we currently carry.

These recommendations are estimates only. Use this chart as a starting point to conduct your own burn tests.

### **NATUREWAX C-3 SOY WAX FOR CONTAINERS**

Tealights	Eco 1
Votives & Small Containers	HTP 41
Votives & Small Containers	HTP 52
2" Diameter Container	HTP 73
2.5" Diameter Container	HTP 93
3" Diameter Container	HTP 104
3.5" Diameter Container	HTP 1212

*Please note that in our burn tests with the 9" Amber and Clear Straight-Sided Jar, the HTP 1212 gave us the better melt pool using C-3 wax even though the diameter is 2.88".*

*The HTP 104 wicks work well for the 4 oz tins and the HTP 1212 work for the 8 oz tins. We were not able to get complete melt pools with the smaller wick sizes, although some of our customers have been able to get good clean burns with HTP 93 and the 4 oz. tins. Just a couple of examples why it is so important to test.*

### **GOLDEN BRANDS/AAK 464 WAX FOR CONTAINERS**

Tealight	Eco 1
1.75" - 2.19" Diameter Containers	CD 4
2.2" – 2.69" Diameter Containers	CD 8
2.7" – 2.94" Diameter Containers	CD 12
2.95" – 3.29" Diameter Containers	CD 18
3.3" – 3.79" Diameter Containers	CD 22

*We found the CD 12 wicks to work best for the 9 oz Amber and Clear Straight-Side Jars. Depending on the fragrance, you may need to wick up or down using Golden Brands wax.*
